## **Jason Brügger, the trapeze artist from Basel**

The show act at the 9th CSI Basel will be presented by a young man from Basel: Jason Brügger. The 24-year-old was born in Basel and since months he is flying through the air with his aerial straps. Since April 2016 most of the Swiss know him. He won the casting show "the biggest Swiss talents" and after that he started performing in circus arenas. He participated at the international circus festival "Young Stage" and was on tour 2017 with the Swiss national circus Knie.

For nine months Jason, who is fascinated from circuses since his early childhood, showed his performance with the aerial straps under the top of the circus tent. Like a white angel with his wide wings he floated over the heads of the amazed spectators. And this great performance will now thrill the audience at the CSI Basel. He will be performing every day and will enthuse everybody, as well as the sound of the military band Pontoon Bridge Regiment from the Ukraine.
